

Extractor

Document Summarization Engine

How does your information stack up?

Get to the heart of the matter

Any developer will tell you that today's volume of information can be too much of a good thing. Focusing on what's important can seem like an insurmountable task. Extractor changes everything by identifying what really matters... in one document, or a mountain of them. Extractor's patented GenEx engine produces results with meaning, relevance, and in context. It will change the way you think about and work with information.

Relevance. Meaning. Context.

Where information matters, Extractor is your competitive advantage.

Extractor is a text summarization engine that consumes documents (text, html, e-mail) and, using a patented genetic extraction algorithm (GenEx), analyzes the recurrence of words and phrases, their proximity to one another, and the uniqueness of the words to a particular document. Extractor is designed for government, corporate and commercial software developers who want to bring the competitive advantage of relevance, meaning and context to document management functionality. Extractor is perfect for information retrieval systems, document management solutions and commercial e-mail add-on programs.

Extractor provides:

- Keyword and Keyphrase extraction from text
- Keyword and Keyphrase highlighting in text
- Automatic ranking of Keywords and Keyphrases
- Keyword/Keyphrase indexing, providing precision results and increased system performance
- Focus on important subject matter (GoTo/Stop words)
- IDE support for C, Java, Perl, Python and Visual Basic
- Operating system support for Linux, Solaris, Windows and Mac OS X
- Support for multi-document processing (multi-threaded)
- HTML tag filtering
- Full feature support in six languages: English, French, German, Japanese, Korean and Spanish

Extractor is ideal for:

- Content review/document evaluation
- Web site optimization
- Document management
- Information retrieval
- Trend analysis
- Content analysis
- Forensic auditing
- Index and Table of Contents creation
- Catalogue and Documents clustering
- Interactive query refinement...
